Subject: Application – Working Student Data, Processes & Systems (Job ID 495922)

Dear Hiring Team,

I am a Master's student in International Software Systems Science at Otto-Friedrich-Universität Bamberg and I am applying for the Working Student position in Data, Processes & Systems at Siemens Healthineers.

I have experience preparing recurring reports, structuring datasets and supporting business processes using Excel, Power BI and presentation tools. In my previous role as a Junior Data Analyst, I supported documentation, reporting and ad hoc analysis tasks that contributed to decision-making and workflow improvements.

I am highly organized, detail-oriented and interested in digitalization, Power Apps and process optimization. I am available for at least one year and can support your team for 15 hours per week.

Thank you for your consideration. I look forward to the opportunity to contribute to your team.

Kind regards,
Syed Ali Azain
